- Sales increased 7.1 billion yen to an all-time high for the first half, while operating profit fell 1.5 billion yen. Domestic business gains are making up for our slowdown in overseas business.
- The decrease in ordinary profit exceeds the fall in operating profit because of losses recorded due to COVID-19.
- Net profit decreased significantly due to a reversion from the gain on sales of securities recorded the previous year.

- In Consulting, sales decreased due to the impact of lockdowns overseas (North America, India, etc.).
- In Financial IT Solutions,
 - In Securities, sales increased significantly due to the consolidation effect of making Nippon Securities Technology (NSTec) into a subsidiary and progress in shared online services (THE STAR) implementation projects.
 - In Insurance, sales decreased due to the end of a round of development projects last year for non-life insurers.
- In Industrial IT Solutions,
 - In Distribution, sales decreased due to reversion from work in dealing with the consumption tax hike the previous year, as well as delays and other problems with overseas projects for domestic clients.
 - In Manufacturing, Service and other, sales decreased at overseas subsidiaries. However, sales increased domestically due to brisk business in DX-related projects for telecommunications, distribution, and other sectors.
- In IT Platform Services, sales increased due to more projects in information security-related business.

- Sales to Nomura Holdings were around the same as at this point last year.
- In Overseas business, sales decreased due to the impact of lockdowns in North America, Australia, and other countries.
For Australia, half of the decrease was due to exchange rate impact.
- Main clients of Brierley+Partners in North America including major airlines, distribution, and rental car companies have been severely impacted by COVID-19.

- We recorded a non-operating loss of around 500 million yen due to COVID-19. This was a result of restructuring costs from personnel cutbacks overseas, as well as costs of having temp staff employees in Japan on standby at home.

Key Factors in Financial Results for 2Q FY March 2021

■ Higher income with +2.8% in sales

- Overseas business slumped due to lockdowns, but domestic DX-related business showed strong growth

■ -3.9% in operating profit

- Lower revenues from overseas business impacted profit, but domestic business was hardly impacted and maintained high productivity thanks to production work via telecommuting

We are making steady progress on a growth trajectory toward achieving V2022, as Japanese companies are shifting to digital more quickly due to the paradigm shift caused by the COVID-19 pandemic.

Recent initiatives: DX strategy

The COVID-19 pandemic is causing a paradigm shift of telecommuting and change in behavior

Freedom of time (telecommuting)

- Greater prevalence of telecommuting is eliminating set commuting hours and significantly increasing personal **disposable time**

Freedom of place (more activity online)

- Dramatic **change in behavior** is moving **more activity online (non-face-to-face)** through digital technologies

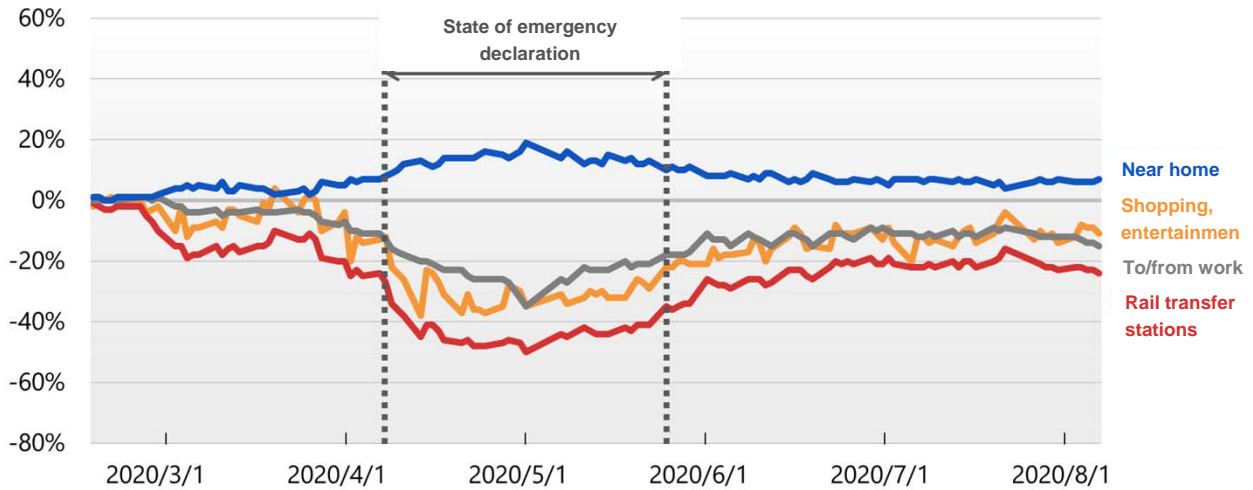

This paradigm shift is generating new demand

Recent initiatives: DX strategy

Change in behavior caused by self-restrictions on movement has still not reverted

Recent initiatives: DX strategy

Trend toward non-face-to-face and non-contact is driving demand in e-commerce

- Online shopping increased dramatically since around the time that the state of emergency was declared in April.
- NRI has received more inquiries in areas such as e-commerce related solutions and functional upgrades.

Recent initiatives: DX strategy

Con-Solutions in e-commerce business support

- In certain e-commerce projects we combine **consulting and systems** to support clients' business growth.
 - **Closeness (unity) with clients' senior management** is key. We support clients as their business partner.
 - We release **10 themes per week and around 500 themes per year** through Agile development.

Recent initiatives: Global strategy

Status and policy measures for Australia

Macro environment

- The impact of movement restrictions and other COVID-19 measures is easing
- **No reduction in federal gov't IT budget (for new fiscal year)**

Current business state

- Performance remained stable for IT managed services and M&T, but projects in advisory and solutions decreased
- **IT demand is bottoming out in the first half, and expected to recover in the second half**

Future actions

- Rebuild business in advisory and solutions
 - Thorough cost control through restructuring (completed)
 - Shift toward high-earnings projects (in progress)
- **Deploy regional strategies along with movements in the M&A market**
- **Non-consolidated earnings for ASG are expected to turn positive in the second half**

Other

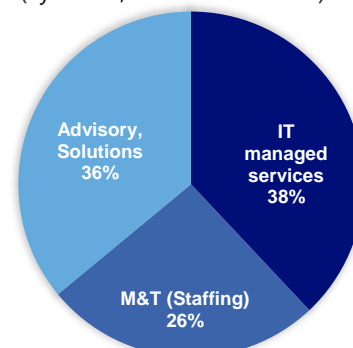

- Continue procedures to acquire AUSIEX shares

- Domestically, order backlog increased in every segment.
- In Consulting, we expect a recovery in the second half thanks to robust demand.
- In Financial IT Solutions,
 - In Securities, robust backlog in the first half will continue into the second half.
 - In Insurance, orders from large life insurers are picking back up, which is having a positive effect on order backlog.
- Order backlog appears low in Industrial IT Solutions because the project cycles are shorter due to agile development, resulting in sales being recorded sooner after the orders are received. The sentiment from the front lines is that orders are in good shape.
